

Busch-Radios

The best entertainment
at home

Music touches the emotions.
Wherever you are.

Setting the tone. Busch-Jaeger has been the leading brand in the electrical installation sector and intelligent building communication for over 130 years. With our audio solutions, living space can also be designed acoustically; in hotels and restaurants as well as shops or at home. With our innovative radios that are great to listen to, they display themselves unobtrusively and boast a space-saving design within our range of switches. Wherever you are.

For those special moments.
Busch-DigitalRadio.

AUX INPUT

FM RADIO

Enjoying comfort every day. Relaxing in the bathroom with pleasant music or listening to the latest news in the office; blissfully with the Busch DigitalRadio. Whilst space-saving in a flush-mounted box it unobtrusively cares for the right atmosphere in any location. And, of course, with the best quality of sound.

- » RDS station identification
- » Automatic setting of the time via RDS signal
- » Mono or stereo operation
- » Use of internal or external antenna
- » Radio and loudspeakers can be placed in combination or separately

01

Stereo sound also in the kitchen. The Busch-DigitalRadio is easily installed in a flush-mounted box. The loudspeaker can be placed directly next to it or at a distance. Stereo operation is possible also with two Busch-Jaeger flush-mounted loudspeakers.

outlets and loudspeakers

02

If the Busch-DigitalRadio is combined with comfort switches, it switches on and off automatically. It can, however, also continue to be operated directly independent of the lights.

The Busch-DigitalRadio receives regional stations and stores up to eight radio programs. It is operated comfortably and intuitively via the elegant multifunction rocker. The large illuminated display shows, among others, the name of the station, the time and the status of the integrated alarm/sleep function.

01

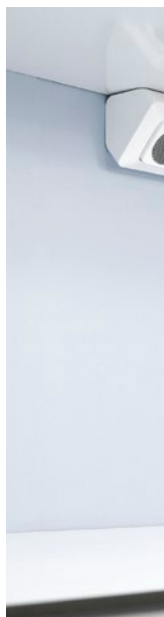

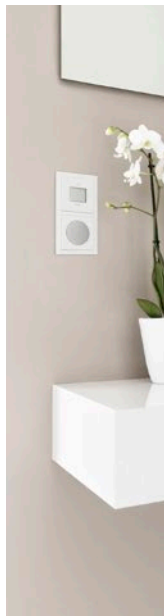

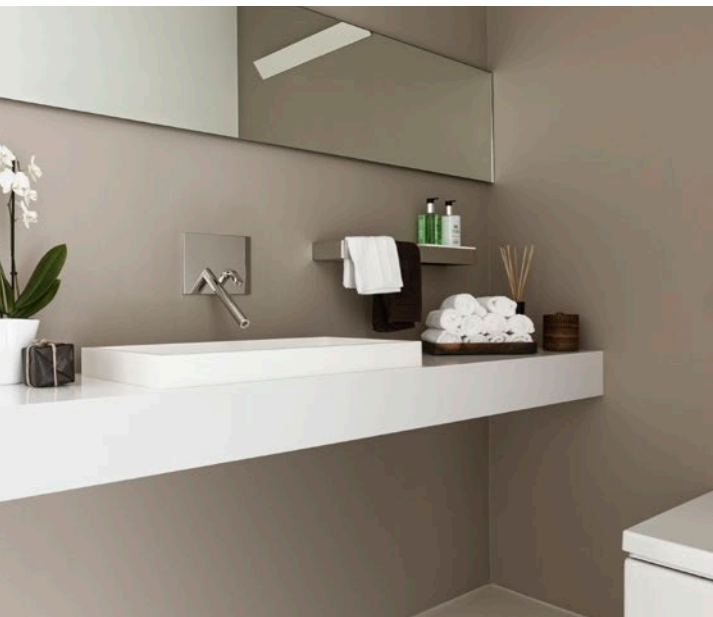

02

For corner mounting, such as below a high-mounted cabinet in the kitchen, a special combination set is available which consists of the Busch-DigitalRadio and the loudspeakers tailored to it. The power is supplied via a separate power cable, the path of the cable can run invisible behind the high cabinet.

01 3gang combination Busch-Comfort switch, Busch-DigitalRadio and loudspeaker

02 Surface-mounted housing for corner mounting including Busch-DigitalRadio and loudspeaker

It's a matter of taste. Busch-Radio BTconnect.

AUX INPUT

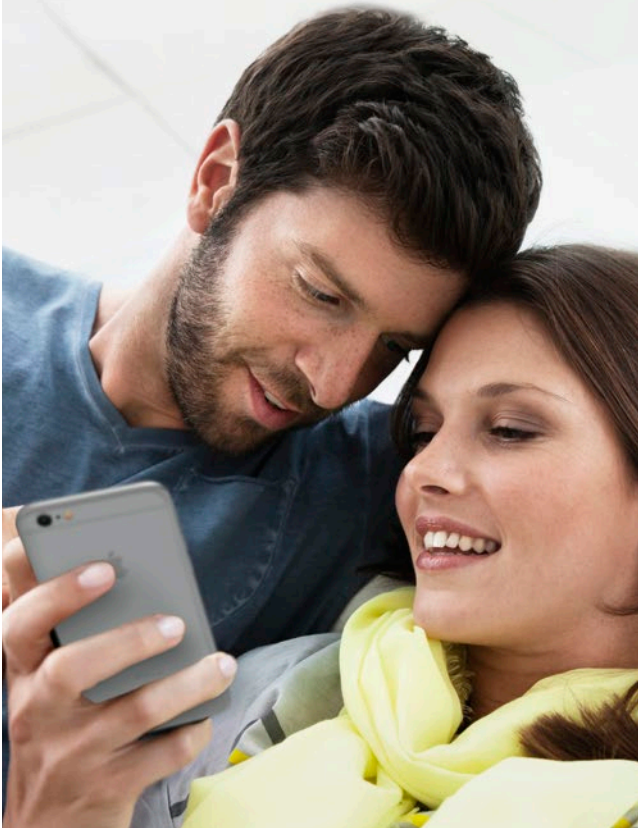

FM RADIO

BLUETOOTH

The utmost in comfort. Listening to regional radio programs in the highest quality. And streaming one's own music from the smartphone, tablet or laptop via Bluetooth according to one's mood and fancy. The Busch-Radio BTconnect makes it possible.

- » Bluetooth streaming from the smartphone, among others.
- » Favourites are switched through directly
- » RDS station identification
- » NEW: Radio text
- » Automatic setting of the time via RDS signal
- » The device connected last is automatically coupled when entering the receiving area of the Bluetooth receiver
- » Use of internal or external antenna
- » NEW: Automatic switchover between antenna inputs

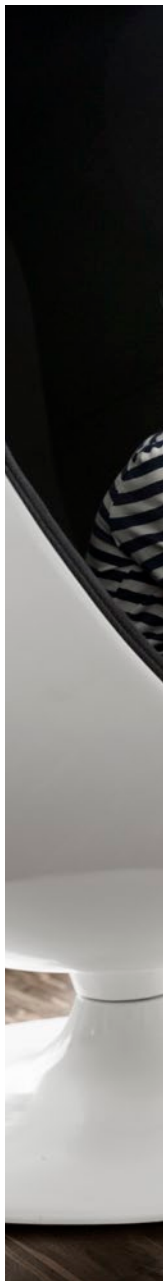

- 01 3gang combination of Busch-Dimmer®, Busch-Radio BTconnect, loudspeaker insert with cover plate
-

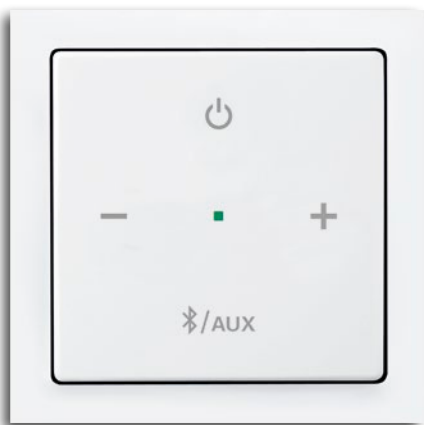

01

The Busch-Radio BTconnect combines an FM radio and a Bluetooth receiver in a single flush-mounted box. You can play your music collection from Bluetooth-capable smartphones, tablets or laptops at all times in their full splendour via the radio. Coupling is carried out manually, but for Android devices it is also possible via NFC. The device connected last is coupled automatically when entering the receiving area of the Bluetooth receiver. For optimizing the sound, predefined sound profiles (equalizer) for "Rock", "Jazz" and "Classic" have been implemented.

The wall is getting smart. Busch-Bluetooth Receiver.

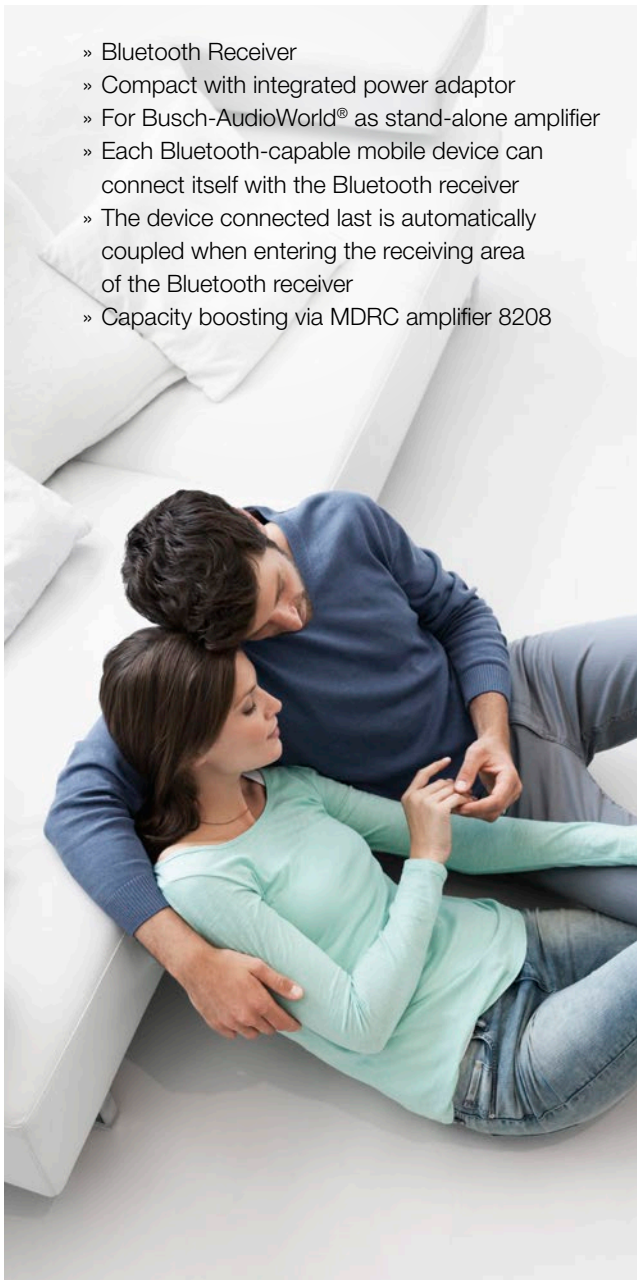

AUX INPUT

BLUETOOTH

Minimalist. The Busch-Bluetooth Receiver is the ideal solution for all who stream their own selection of music from the smartphone and do not need a flush-mounted radio. The new receiver impresses with its high tonal quality and connection for an external music source. The receiver receives the data via Bluetooth, to continue processing them directly. Cleanly amplified via the wall loudspeakers without any visible cables.

- » Bluetooth Receiver
- » Compact with integrated power adaptor
- » For Busch-AudioWorld® as stand-alone amplifier
- » Each Bluetooth-capable mobile device can connect itself with the Bluetooth receiver
- » The device connected last is automatically coupled when entering the receiving area of the Bluetooth receiver
- » Capacity boosting via MDRC amplifier 8208

World-wide reception. Busch-Radio iNet.

Always your favourite station. Digital and limitless. From home or the other side of the globe. Easy via WLAN with the Busch-Radio iNet. With perfect high-quality sound, without hissing and interference. Including comfortable additional functions such as alarm clock and automatic activation and deactivation.

- » Exclusive reception via WLAN
- » Radio station selection via tunein.com
- » Control via smartphone and tablet possible
- » Replay of audio files of a UPnP server

01 3gang combination of Busch-Radio iNet, loudspeaker insert with cover plate and SCHUKO® socket outlet with hinged lid

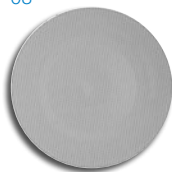

02 Moisture-proof loudspeaker 13 cm (5"), protection type IP20

03 Built-in ceiling loudspeakers 8 cm (3"), protection type IP20

02

03

The Busch-Radio iNet delivers thousands of programs free into the home to suit everyone's taste. Simply select your favourite radio station via service provider tunein.com - e.g. according to genre, country or language. Aside from all the functions offered by the Busch-DigitalRadio, the Busch-Radio iNet additionally offers the option of playing the audio files of a UPnP server. It is controlled and operated very comfortably via smartphone or tablet.
